<i>Foreword to the seventh edition</i>	<i>v</i>	Problem solving: Abdominal paracentesis	48
<i>Introduction and guidelines for use</i>	<i>vii</i>	References and further reading	49
<i>Quick reference to the guidelines</i>	<i>xvii</i>		
<i>Acknowledgements</i>	<i>xxi</i>	<b>5 Aseptic technique</b>	<b>50</b>
<i>List of contributors to the seventh edition</i>	<i>xxiii</i>	Reference material	51
<i>List of abbreviations</i>	<i>xxvii</i>	Procedure guidelines: Apron: putting on and removing a disposable plastic apron	57
		Procedure guidelines: Aseptic technique	59
		Procedure guidelines: Hand washing	61
		Procedure guidelines: Non-sterile gloves use	64
		References and further reading	67
<b>PART ONE</b>		<b>6 Barrier nursing: nursing the infectious or immunosuppressed patient</b>	<b>70</b>
<b>1 The context of nursing</b>	<b>3</b>	Barrier nursing	71
Introduction	4	Reference material	71
What is nursing practice today?	4	Source isolation	74
Patients' perspective	4	Reference material	74
What do organizations want from nurses?	8	Procedure guidelines: Isolation of source of infection	79
Conclusion	12	Protective isolation	83
References and further reading	12	Reference material	85
		Procedure guidelines: Neutropenic patient care	88
<b>2 Assessment and the process of care</b>	<b>15</b>	Acquired immune deficiency syndrome	90
Introduction	16	Reference material	90
Principles of assessment	16	Human immunodeficiency virus 2	93
Structure of assessment	17	Reference material	93
Methods of assessment	18	Procedure guidelines: Acquired immune deficiency syndrome (AIDS): patient care in a general ward	93
Decision making and nursing diagnosis	20	Antimicrobial-resistant organisms	100
Planning and implementing care	22	Reference material	100
Evaluating care	23	Aspergillosis	104
Summary of recommendations and guidance for practice	24	Reference material	104
Documenting and communicating care	25	<i>Clostridium difficile</i>	105
References	25	Reference material	106
		Cryptosporidiosis	107
		Reference material	107
<b>3 Communication</b>	<b>28</b>	Hepatitis	108
Reference material	29	Hepatitis A	108
Procedure guidelines: Provision of information	30	Reference material	108
Conclusion	39	Procedure guidelines: Hepatitis A: patient care	110
References	39	Hepatitis B	111
<b>PART TWO</b>			
<b>4 Abdominal paracentesis</b>	<b>43</b>		
Reference material	44		
Procedure guidelines: Abdominal paracentesis	46		
Procedure guidelines: Intraperitoneal drain removal	47		

Reference material	111	Procedure guidelines: Compression therapy: limb volume calculation	173
Procedure guidelines: Hepatitis B: patient care	113	Phases of treatment	174
Non-A non-B hepatitis	116	Maintenance phase of treatment	174
Reference material	116	Intensive phase of treatment	175
Procedure guidelines: Non-A non-B hepatitis: patient care	117	Procedure guidelines: Compression garments (elastic): application of	178
Hepatitis C	117	Procedure guidelines: Compression bandaging (standard multilayer)	179
Reference material	117	References and further reading	185
Hepatitis D	118	<b>10 Discharge planning</b>	<b>187</b>
Reference material	118	Reference material	188
Hepatitis E	118	Procedure guidelines: Discharge planning	196
Reference material	118	References and further reading	200
Hepatitis B genotype F	119	<b>11 Drug administration: general principles</b>	<b>202</b>
Reference material	119	Reference material	203
Hepatitis G (HBV/G)	119	Injections and infusions	212
Reference material	119	Summary	219
The herpesviruses	119	Procedure guidelines: Self-administration of drugs	220
Cytomegalovirus	119	Procedure guidelines: Oral drug administration	221
Reference material	119	Procedure guidelines: Injections: administration	224
Epstein–Barr virus	120	Procedure guidelines: Rectal medication administration	231
Reference material	120	Procedure guidelines: Vaginal medication administration	231
Herpes simplex virus	121	Procedure guidelines: Topical applications of medication	232
Reference material	121	Procedure guidelines: Administration of medication in other forms	233
Varicella zoster virus	122	Procedure guidelines: Continuous infusion of intravenous drugs	235
Reference material	122	Procedure guidelines: Intermittent infusion of intravenous drugs	238
Legionnaires' disease	123	Procedure guidelines: Injection (bolus or push) of intravenous drugs	241
Reference material	123	Problem solving: Injection and infusion of intravenous fluids and drugs	244
Listeriosis	124	References and further reading	251
Reference material	124	<b>12 Drug administration: cytotoxic drugs</b>	<b>254</b>
Pneumocystosis	125	Reference material	255
Reference material	125	Procedure guidelines: Cytotoxic drugs: environmental precautions	257
Tuberculosis	126	Procedure guidelines: Cytotoxic drugs: accidental exposure	261
Reference material	126	Routes of administration	262
Transmissible spongiform encephalopathies	128	Intravenous administration	262
Reference material	129	Reference material	262
References and further reading	130	Procedure guidelines: Cytotoxic drugs: intravenous administration	264
<b>7 Breast aspiration and seroma drainage</b>	<b>146</b>	Extravasation of vesicant drugs	266
Breast aspiration	147	Reference material	266
Reference material	149	Procedure guidelines: Extravasation management: peripheral cannula	272
Procedure guidelines: Breast aspiration	149	Oral administration	274
Seroma drainage	151		
Procedure guidelines: Seroma drainage	153		
References and further reading	154		
<b>8 Cardiopulmonary resuscitation</b>	<b>155</b>		
Reference material	156		
Procedure guidelines: Cardiopulmonary resuscitation (CPR)	163		
References and further reading	167		
<b>9 Compression therapy in the management of lymphoedema</b>	<b>169</b>		
Reference material	170		
Assessment of the patient with lymphoedema	171		
Measurement of limb volume	171		
Reference material	172		

Reference material	274	Bladder irrigation recording chart	319
Intramuscular and subcutaneous injection	275	Problem solving	321
Reference material	275	References and further reading	321
Topical application	275		
Reference material	275	<b>15 Elimination: bowel care</b>	<b>324</b>
Intrathecal administration	276	Reference material	325
Reference material	277	Procedure guidelines: Bedpan use: assisting a patient	325
Intrapleural instillation	278	Procedure guidelines: Commode use: assisting a patient	326
Reference material	278	Enemas	335
Procedure guidelines: Cytotoxic drugs: intrapleural administration	279	Reference material	335
Problem solving: Intrapleural cytotoxic drug administration	280	Procedure guidelines: Enema administration	336
Intravesical instillation	280	Problem solving: Enema administration	338
Reference material	280	Suppositories	338
Procedure guidelines: Cytotoxic drugs: intravesical instillation	281	Reference material	338
Problem solving: Intravesicular instillation of cytotoxic drugs	282	Procedure guidelines: Suppository administration	339
Intraperitoneal administration	283	Digital rectal examination	340
Reference material	283	Procedure guidelines: Digital rectal examination	341
Procedure guidelines: Cytotoxic drugs: intraperitoneal instillation	284	Manual evacuation	342
Problem solving: Intraperitoneal instillation of cytotoxic drugs	285	Procedure guidelines: Manual evacuation of faeces	343
Intra-arterial administration	285	Rectal irrigation	344
Reference material	285	Reference material	345
Problem solving: Intra-arterial administration of cytotoxic drugs	287	References and further reading	345
References and further reading	288		
<b>13 Drug administration: delivery (infusion devices)</b>	<b>290</b>	<b>16 Elimination: continent urinary diversions</b>	<b>348</b>
Reference material	291	Reference material	349
Infusion devices	296	Teaching intermittent self-catheterization of a continent urinary diversion stoma	355
Gravity infusion devices	296	Reference material	355
Infusion pumps	298	Procedure guidelines: Continent urinary diversion stoma: self-catheterization	355
Summary	301	Procedure guidelines: Continent urinary diversion stoma drainage tubes: flushing	357
Procedure guidelines: Subcutaneous administration of drugs using a syringe driver (e.g. Sims (Graseby) Medical MS26)	302	Problem solving: Continent urinary diversion stoma	358
Procedure guidelines: Syringe driver: preparation of the syringe and priming the infusion set for 24-hour drug administration using the Sims (Graseby) Medical MS26	303	Useful addresses	359
Procedure guidelines: Syringe driver: inserting the winged infusion set or cannula and connecting syringe	304	References and further reading	359
Problem solving: Syringe drivers	307		
References and further reading	309	<b>17 Elimination: stoma care</b>	<b>361</b>
		Reference material	362
		Procedure guidelines: Stoma care	370
		Procedure guidelines: Urine specimen collection (ileal conduit or urostomy)	372
		Procedure guidelines: Stoma bridge or rod removal	373
		Problem solving: Stoma care	374
		Useful addresses	375
		References and further reading	375
<b>14 Elimination: bladder lavage and irrigation</b>	<b>310</b>	<b>18 Elimination: urinary</b>	<b>377</b>
Reference material	311	Reference material	378
Procedure guidelines: Bladder lavage	314	Procedure guidelines: Urinary catheterization	384
Procedure guidelines: Urinary catheter: maintenance solution administration	316	Procedure guidelines: Urinary catheterization: intermittent self-catheterization	388
Procedure guidelines: Continuous bladder irrigation	318	Procedure guidelines: Urine specimen collection: catheter (CSU)	390

Procedure guidelines: Urinary catheter bag: emptying	392	Procedure guidelines: Nasogastric intubation with tubes using an introducer	482
Procedure guidelines: Urinary catheter removal	392	Procedure guidelines: Nasogastric intubation with tubes without using an introducer, e.g. a Ryle's tube	484
Problem solving: Urinary catheter	393	Procedure guidelines: Percutaneous endoscopically placed gastrostomy (PEG) tube care	486
Penile sheaths	395	Procedure guidelines: Radiologically inserted gastrostomy (RIG) tube care	488
Reference material	395	Procedure guidelines: Jejunostomy feeding tube care	488
Procedure guidelines: Penile sheath application	396	Procedure guidelines: Enteral feeding tubes: administration of medication	489
References and further reading	397	Procedure guidelines: Enteral feeding tube: unblocking	490
<b>19 Gene therapy for the management of cancer</b>	<b>400</b>	Problem solving: Swallowing difficulties	491
Reference material	401	References and further reading	494
Procedure guidelines: Gene therapy: patient care	405	<b>25 Observations</b>	<b>496</b>
Further advice	410	Pulse	497
References and further reading	410	Reference material	497
<b>20 Haematological procedures</b>	<b>412</b>	Procedure guidelines: Pulse measurement	501
Reference material	413	Twelve-lead electrocardiogram (ECG)	502
Bone marrow procedures	414	Procedure guidelines: Electrocardiogram (ECG)	502
Apheresis procedures (donor or therapeutic)	417	Blood pressure	504
Procedure guidelines: Bone marrow aspiration and trephine biopsy	419	Reference material	504
Procedure guidelines: Bone marrow harvest	422	Procedure guidelines: Blood pressure (manual)	510
Problem solving: Bone marrow harvest	425	Respiration	512
References and further reading	426	Reference material	513
<b>21 Intrapleural drainage</b>	<b>428</b>	Procedure guidelines: Pulse oximetry	520
Reference material	429	Peak flow	521
Procedure guidelines: Intrapleural drain insertion	434	Reference material	521
Procedure guidelines: Intrapleural drain: changing the drain bottle	438	Procedure guidelines: Peak flow reading using manual peak flow meter	522
Procedure guidelines: Intrapleural drain removal	439	Temperature	522
Problem solving: Intrapleural drainage	441	Reference material	524
References and further reading	442	Urinalysis	528
<b>22 Last offices</b>	<b>444</b>	Procedure guidelines: Temperature measurement	529
Reference material	445	Reference material	530
Procedure guidelines: Last offices	446	Characteristics of urine	530
Issues specific to critical care	449	Procedure guidelines: Urinalysis	532
Procedure guidelines: Last offices: additional considerations in critical care	450	Blood glucose	533
Problem solving: Last offices	451	Reference material	533
Procedure guidelines: Last offices: requirements for people of different religious faiths	452	Procedure guidelines: Blood glucose monitoring	536
References	456	Central venous pressure	538
Further reading on religious faiths	457	Reference material	538
<b>23 Lumbar puncture</b>	<b>459</b>	Procedure guidelines: Central venous pressure measurement	539
Reference material	460	Problem solving: Central venous pressure (CVP)	540
Procedure guidelines: Lumbar puncture	463	References	541
Problem solving: Lumbar puncture	465	<b>26 Observations: neurological</b>	<b>545</b>
References and further reading	466	Reference material	546
<b>24 Nutritional support</b>	<b>467</b>	Procedure guidelines: Neurological observations and assessment	553
Reference material	468	References and further reading	556
Procedure guidelines: Weighing the patient	479		
Procedure guidelines: Feeding an adult	481		

<b>27 Pain management and assessment</b>	<b>557</b>	<b>Postanaesthetic recovery</b>	<b>617</b>
Reference material	558	Reference material	617
Procedure guidelines: Pain control: assessment and education of patient prior to surgery	572	Procedure guidelines: Postanaesthetic recovery	620
Procedure guidelines: Pain assessment chart: chronic	573	Problem solving: Postanaesthetic recovery	623
References and further reading	573	Procedure guidelines: Postoperative recovery	625
		References and further reading	627
<b>28 Pain management: Entonox administration</b>	<b>577</b>	<b>31 Personal hygiene: eye care</b>	<b>629</b>
Reference material	579	Reference material	630
Procedure guidelines: Entonox administration	581	Procedure guidelines: Eye swabbing	637
Problem solving: Entonox administration	582	Procedure guidelines: Artificial eye care	638
References and further reading	583	Procedure guidelines: Contact lens care	639
		Procedure guidelines: Eye drop instillation	641
<b>29 Pain management: epidural and intrathecal analgesia</b>	<b>585</b>	Procedure guidelines: Eye ointment instillation	642
Reference material	586	Procedure guidelines: Eye irrigation	643
Epidural/intrathecal analgesia for patients with intractable chronic and cancer pain	591	Procedure guidelines: Eyelid closure for comatose patients	645
Procedure guidelines: Epidural/intrathecal catheter for chronic pain: preinsertion management	592	References and further reading	646
Procedure guidelines: Epidural/intrathecal catheter insertion	593	<b>32 Personal hygiene: mouth care</b>	<b>647</b>
Procedure guidelines: Epidural/intrathecal infusion: setting up utilizing an ambulatory pump	594	Reference material	648
Procedure guidelines: Epidural/intrathecal catheter for chronic pain management: post-insertion management	595	Procedure guidelines: Mouth care	654
Procedure guidelines: Epidural/intrathecal exit site dressing change	596	Problem solving: Mouth care	656
Procedure guidelines: Epidural/intrathecal analgesia top up (bolus)	597	References and further reading	657
Procedure guidelines: Discharge planning for patients with epidural/intrathecal catheter in situ	597	<b>33 Personal hygiene: skin care</b>	<b>660</b>
Procedure guidelines: Epidural/intrathecal catheter removal	599	Reference material	661
Problem solving: Epidural/intrathecal infusions of local anaesthetic agents and opioids: management of side-effects	599	Procedure guidelines: Bed bathing a patient	664
Problem solving: Epidural/intrathecal insertion: complications	601	References and further reading	666
Problem solving: Epidural/intrathecal catheter: issues with pump and site	602	<b>34 Positioning</b>	<b>668</b>
References and further reading	603	Reference material	669
<b>30 Perioperative care</b>	<b>605</b>	Principles of positioning	669
Preoperative care	606	Medical considerations	669
Reference material	606	Positioning in bed	670
Procedure guidelines: Antiembolic stockings: fitting and wearing	608	Procedure guidelines: Positioning the patient supine	670
Procedure guidelines: Preoperative care	611	Procedure guidelines: Positioning the patient sitting in bed	671
Intraoperative care	613	Procedure guidelines: Positioning the patient side lying	672
Reference material	613	Guidance for assisting patients to move	673
Procedure guidelines: Intraoperative care	616	Procedure guidelines: Moving from lying to sitting: assisting the patient	674
		Procedure guidelines: Positioning the patient in a chair	675
		Procedure guidelines: Moving from sitting to standing: assisting the patient	675
		Procedure guidelines: Walking: assisting the patient	681
		Procedure guidelines: Positioning to minimize the work of breathing	682
		Procedure guidelines: Positioning to maximize ventilation/perfusion (V/Q) matching and oxygenation	683
		Positioning of patients with cardiorespiratory compromise	684

Positioning to maximize the drainage of respiratory secretions	684	Regulations	733
Positioning the patient with neurological impairment	684	Web resources	733
Procedure guidelines: Positioning the neurological patient with tonal problems	686	References and further reading	733
Procedure guidelines: Positioning the preoperative and postoperative amputee patient	688	<b>37 Renal replacement therapy: peritoneal dialysis and continuous venovenous haemodiafiltration</b>	<b>735</b>
Positioning and amputee management	688	Reference material	736
References and further reading	689	Peritoneal dialysis	736
<b>35 Radioactive source therapy: sealed sources</b>	<b>691</b>	Reference material	736
Sealed radioactive source therapy	692	Continuous renal replacement therapy	739
Reference material	692	Reference material	739
Remote afterloading	698	Procedure guidelines: Peritoneal dialysis	740
Reference material	698	Problem solving: Peritoneal dialysis	742
Procedure guidelines: Sealed radioactive sources insertion: patient care	702	Procedure guidelines: CVVHDF: utilizing a CVVHDF device	744
Procedure guidelines: Intraoral sealed radioactive sources: patient care	704	References and further reading	747
Procedure guidelines: Iridium and caesium gynaecological sources (manual and afterloaded): patient care	705	<b>38 Respiratory therapy</b>	<b>749</b>
Procedure guidelines: Gynaecological caesium and iridium wires removal	706	Reference material	750
Problem solving: Gynaecological caesium and iridium wires	708	Continuous positive airway pressure	756
Procedure guidelines: Selectron treatment: patient care	708	Reference material	756
Procedure guidelines: Selectron applicator removal	709	Hazards of oxygen therapy	758
Problem solving: Selectron treatment	710	Procedure guidelines: Pre-continuous positive airway pressure (pre-CPAP)	760
Procedure guidelines: Radioactive seeds (e.g. iodine-125): patient care	711	Procedure guidelines: Continuous positive airway pressure (CPAP): setting up	761
Procedure guidelines: Breast sealed radioactive sources: patient care	712	Procedure guidelines: Humidification for respiratory therapy	761
Procedure guidelines: Interstitial perineal template (Hammersmith hedgehog)	712	Problem solving: Oxygen therapy by nasal cannulae or oxygen mask	762
Useful websites	714	Problem solving: Continuous positive airway pressure (CPAP)	763
References and further reading	714	References and further reading	765
<b>36 Radioactive source therapy and diagnostic procedures: unsealed sources</b>	<b>716</b>	<b>39 Scalp cooling</b>	<b>766</b>
Reference material	717	Reference material	767
Procedure guidelines: Iodine-131: pre-administration care	726	Procedure guidelines: Scalp cooling	770
Procedure guidelines: Iodine-131 thyroid treatment: patient care	726	Problem solving: Scalp cooling	772
Procedure guidelines: Iodine-131 mIBG treatment: patient care	727	References and further reading	772
Procedure guidelines: Unsealed source therapy: patient care post-administration	727	<b>40 Specimen collection for microbiological analysis</b>	<b>774</b>
Procedure guidelines: Unsealed radioactive sources for diagnostic investigations: patient care	730	Reference material	775
Procedure guidelines: Unsealed radioactive sources: emergency procedures	731	Procedure guidelines: Specimen collection: section swabs	781
		Procedure guidelines: Specimen collection: body fluid	784
		Procedure guidelines: Cervical uterine smear or Pap smear	789
		References and further reading	793
		<b>41 Spinal cord compression management</b>	<b>795</b>
		Reference material	796
		Procedure guidelines: Moving and handling a person with suspected spinal cord compression	800
		Procedure guidelines: Spinal cord compression (suspected): assessment	801

Procedure guidelines: Spinal cord compression (suspected): treatment	803	Reference material	869
Procedure guidelines: Spinal cord compression (suspected): rehabilitation	804	Skin-tunnelled catheters	872
Problem solving: Spinal cord compression (suspected)	806	Reference material	872
References	807	Implantable ports	874
		Reference material	874
		Discharging patients home with a VAD in situ	876
		Quality-of-life issues: living with a VAD	877
		Procedure guidelines: Peripheral cannula insertion	878
<b>42 Tracheostomy care and laryngectomy care (including voice rehabilitation)</b>	<b>809</b>	Procedure guidelines: Midline catheter insertion	882
Tracheostomy and laryngectomy care	810	Procedure guidelines: Peripherally inserted central catheter (PICC) insertion and removal	884
Reference material	810	Procedure guidelines: Central venous catheter insertion site dressing change	887
Laryngectomy voice rehabilitation	819	Procedure guidelines: Central venous access device: maintaining patency	888
Reference material	820	Procedure guidelines: Central venous access device: taking blood samples	889
Procedure guidelines: Tracheostomy dressing change	822	Procedure guidelines: Central venous access device: unblocking an occlusion	891
Procedure guidelines: Tracheostomy suction	823	Procedure guidelines: Implanted ports: insertion and removal of non-coring needles	894
Humidification	824	Procedure guidelines: Central venous catheter (non-cuffed/tunnelled): removal	896
Procedure guidelines: Humidification of patient with tracheostomy	825	Procedure guidelines: Central venous catheter (skin-tunnelled): surgical removal	897
Procedure guidelines: Tracheostomy tube change	825	Problem solving: Central venous access devices	899
Problem solving: Tracheostomy	827	Arterial cannulae	902
Procedure guidelines: Changing a Blom–Singer type non-indwelling voice prosthesis	828	Reference material	902
References and further reading	829	Procedure guidelines: Arterial puncture: radial artery	904
		Procedure guidelines: Arterial cannula insertion: preparation and setting up of monitoring set	907
		Procedure guidelines: Arterial cannula: taking a blood sample	909
		Procedure guidelines: Arterial cannula: removal	911
		Problem solving: Arterial cannulation	912
		References and further reading	913
<b>43 Transfusion of blood and blood products</b>	<b>831</b>		
Reference material	832	<b>46 Venepuncture</b>	<b>919</b>
Procedure guidelines: Blood product request	843	Reference material	920
Problem solving: Requesting a blood product	843	Procedure guidelines: Venepuncture	924
Procedure guidelines: Blood sampling: pre-transfusion	844	Problem solving: Venepuncture	928
Problem solving: Blood sampling: pre-transfusion	844	References and further reading	931
Procedure guidelines: Transfusion of blood components	845		
Problem solving: Transfusion of blood components	847	<b>47 Violence: prevention and management</b>	<b>932</b>
References and further reading	847	Reference material	933
		Procedure guidelines: Violence: prevention and management	938
		References and further reading	940
<b>44 The unconscious patient</b>	<b>849</b>		
Reference material	850	<b>48 Wound management</b>	<b>942</b>
Procedure guidelines: Unconscious patient care	852	Wound healing and management	943
